SUMMARY

Goals and Tasks:

- My primary goal is to extract meaningful insights from population data to inform decision-making processes.
- Find a user-friendly tool that simplifies the process of generating detailed population reports.
- Uncover trends and patterns in population demographics.

Frustrations and Concerns:

- Delays or technical issues with the tool during the use.
- Limited customization options in existing tools.
- Inaccurate or outdated data sources.

Preferences and ideas for reliable and beneficial demographic tools:

- Applications with intuitive interfaces that allow for easy navigation and customization of reports
- Time efficiency of searching tools based on result output speed
- User control over the parameters and filters used in generating reports.
- Reliability of sources, including frequent updates of database.

EXPERIENCE

Demographer, 02/2020 - Current

National Statistics - London

- As a demographer, I study population dynamics, including birth rates, death rates, migration patterns, and demographic trends. I analyze population data to understand population structures and changes over time.

EDUCATION

Diploma of Higher Education: Demography, 2018

University of Oxford - Oxford, OXF

- "Aspiring Talent" Academic Achievement Award
- Dissertation in "Gender and Demographic Change: Perspectives from Developing Countries".
