SUMMARY

Goals and Tasks:

- My primary goal is to extract meaningful insights from population data to inform decision-making processes.
- Find a user-friendly tool that simplifies the process of generating detailed population reports.
- Uncover trends and patterns in population demographics.

Frustrations and Challenges:

- Due to numerous responsibilities, face time constraints and requires tools that save time and enhance efficiency.
- Adapting to the dynamic business environment is challenging, and the application should provide flexibility.

Expectation

- Expects the application to have a user-friendly interface for easy navigation and quick access to relevant information.
- The application should allow customization to fit the specific needs of her business and adapt to changing requirements.
- Security is a top priority, and the application should implement login credentials to ensure secure access sensitive data.

EXPERIENCE

Business Operations Manager, 01/2024 - Current
National Statistics - California

- Developed and shared best practices across company to align with objectives and quality standards.
